

# Government Solutions

BitSec Global Forensics is a leading provider of computer forensics, information security, and incident response solutions and training for federal, state and local government agencies. Our nationwide staff of subject matter experts, consultants, and instructors, many of whom possess active national security clearances, have traveled the globe since 2005 in support of government initiatives related to the detection, investigation, and prosecution of cyber related crimes and terrorism.

## Teaming Opportunities

BitSec often partners with other companies to provide unique capabilities and experiences to a team for the purpose of pursuing government contract opportunities. BitSec seeks qualified teaming partners that share common corporate standards, ethics, and values. As a small business, BitSec has successfully partnered with larger prime contractors like Lockheed Martin, C2 Technologies, VSE, and Network Designs to win and service government contracts.

## Positive Past Performance

BitSec has established a positive past performance as a sub-contractor in support of several large international U.S Government contracts including the Global Antiterrorism Training Assistance (GATA) program of the U.S. State Department's Bureau of Diplomatic Security and Office of Antiterrorism Training Assistance. Specializing in the development and delivery of cutting edge, mission specific cyber training, BitSec has supported GATA in over 25 countries on 5 continents, including areas in the Middle East, Africa, Far East, South America, the Caribbean and the United States.

BitSec Global Forensics also actively supports the U.S. Department of Defense. Most recently, BitSec supported the U.S. Naval Systems Command (NAVSEA) International Fleet Support Program which provides support and follow-on technical assistance to foreign armed forces.

## BitSec Global Forensics Government Solutions Include

- A proven global ability to deliver cutting edge custom designed cyber training and exercises
- Experienced subject matter experts, consultants and instructors with National Security clearances
- Course development to establish, expand, or improve training offerings
- Bundled software and hardware solutions from EnCase, F-Response, HBGary Responder, Nuix, and Voom Technologies
- Teaming

**"BitSec has been an integral part of the training team for the Antiterrorism Assistance Cyber Training Program since 2005 and consistently provides outstanding performance in the areas of technical teaching, managerial advising, and business process. They have traveled to all corners of the world, worked in semi-permissive environments, and they are a key factor in the success of the ATA Program. BitSec is a highly valued member of the team with an unprecedented "can-do" attitude that shows they understand the mission of the organization and possess a genuine interest in the success of the program."**

*Mike Alcorn, Senior Management Advisor  
U.S. State Department*

**"BitSec has provided consistent and thorough quality for our computer forensic offerings. I highly recommend their work and continue to use them as expert consultants for high profile work efforts."**

*Greg Conran CTO, Network Designs, Inc.*

**"BitSec Global Forensics provided on time, thorough and insightful subject matter expertise; they were a key factor in the project's success."**

*C2 Technologies, Inc.*
